PLEASE REVIEW AND INITIAL THE FOLLOWING ITEMS:

- _____ Land Disturbance is less than 4,999 square feet.
- _____ Silt fence and/or other siltation barriers will be installed properly along topographical contours down slope of the area to be Disturbed prior to any grading, clearing, and/or any other construction activity. Soil, sand, rock, or any other debris will be kept off the roads and adjacent properties, kept out of storm drains, watercourses, and ponds, and, if for any reason some escapes the construction site, the debris is to be immediately removed. Excavated topsoil to be reused must be encircled by properly installed silt fencing.
- _____ Undisturbed Vegetative buffers of 50 feet and non-impervious buffer of 75 feet must be provided along natural watercourses. There shall be no clearing, grading, construction, or disturbance of vegetation except as permitted by Ordinance No. 2005040706 Unified Code Ordinances of City of Canton.
- _____ Permanent grass or other approved ground cover must be established to prevent erosion. Soil stabilization measures must be performed within 14 days in portions of the site where construction activities have temporarily or permanently ceased and within 30 days of final grading.
- _____ Sediment that has escaped the construction site and has collected in the street or drainage structures cannot be washed into the storm sewers: **ANY SEDIMENT MUST BE PHYSICALLY REMOVED IMMEDIATELY.** Sediment must be removed from sediment barriers, ponds, and other sediment controls when design capacity has been reduced by 33%.
- _____ All slopes on site cannot be greater than 2.1 at final grade.
- _____ Building and waste materials and non storm water discharges, such as concrete, paint wash water, or machinery leakage or spillage must be managed to prevent them from entering the storm water system, ground water, or nearby body of water.
- _____ For land disturbances of 5,000 sq. ft. or greater, erosion prevention and sediment controls must be inspected weekly, 48 hours after a 1" rain event in 24 hours, and/or an erosive rain event. The permittee shall maintain written records of such checks and repairs. These records must be kept on the site or in the office of the responsible person and available for review at any time by an individual from the Development Department staff.
- _____ Grading on the project site must not alter or impound surface stormwater runoff nor alter any surface drainage approved for the overall development. Adequate private drainage systems shall be installed to intercept and drain surface runoff where it is impounded by the improvements
- _____ After a Notice of Deficiency is issued, the responsible parties will have 7 days to correct deficiencies prescribed.
- _____ If project is located in a protected wetland or in a designated floodplain, appropriate permits must be obtained from the federal, state, and county governmental agencies and submitted with this application.
- _____ If a natural watercourse or a designated tree preservation area is on the site, the site plan must show the watercourse or tree preservation location, the required setback buffer, and the grading/clearing limits.

Joby A. West, P.E.

CITY ENGINEER

I hereby certify, under penalty of law, that I have reviewed this document and understand the erosion protection and sediment control requirements here in. I agree to implement and follow the provisions of the permit for the construction site. I understand that these requirements will be inspected and enforced by City of Canton and failure to comply may result in the issuance of a "Stop Work Order" and/or other penalties until compliance is accomplished. The undersigned will be responsible for complying with this permit and all applicable provision of the City of Canton Unified Development Ordinance as adopted. I am the responsible party regarding the performance of the grading operation and I assure that all off-site properties and State and County and City roads will be adequately protected from sedimentation and erosion.
